CURES . BLOOD POISON

Contagious Blood Poison manifests itself in the most loathsome symptoms, such as ulcerated mouth and throat, copper-colored spots, and even sores and ulcers on different portions of the body. The poison causes the hair to fall out, and sometimes the glandular system is attacked. No medicine can cure Contagious Blood Poison which does not rid the circulation of every particle of the insidious virus. The least taint left in the blood will break out afresh when treatment is left off. S.S.S. is the real and certain cure for Contagious Blood Poison; it goes into the circulation, and by removing every particle of the poison, and adding, rich, healthy qualities to the blood, forever cures this powerful disorder. All who suffer with this disease may cure themseves in the privacy of their homes by using S.S. and following instructions contained in our Home Treatment Book, which we will send, together with any medical advice desired, free of charge. S.S.S. is for sale at drug stores.
